

At IP Marine we understand that every ship can benefit from being better connected. Our IPTV system is the heart of a better connected ship, giving crew and passengers a rich entertainment experience, while being expandable to securely connect almost any device around the vessel, enhancing safety, efficiency, crew and passenger welfare

Watch live TV on any device

Watch live satellite television on TV, PC, tablet and phone
Every device has access to hundreds of satellite TV and radio channels

Record shows and watch later

Recorded shows can be made available to everyone on the vessel
Schedule recordings on the 7 day programme guide

Central Server

- Distribute live and recorded TV and radio
- Flexible storage options to suit your vessel
- Securely store thousands of hours of HD content
- Centrally store safety and instructional videos
- Simple management interface
- Remote management via VSAT or 3G/4G

Centrally store your movies

Everyone's favourite films available all of the time on any device

Centrally store your TV shows

Everyone's favourite TV shows available at your fingertips

Weather charts and forecast at your fingertips

Keep your crew and passengers updated with weather forecasts and charts

Safety Videos

Display safety and instructional videos

Ship's itinerary
Sailing times
Dining menus
Duty free special offers

Any video or graphical information you require can be displayed throughout the ship

The IPTV network forms the heart of the connected ship

We believe a better connected ship can enhance safety, efficiency and crew and passenger welfare

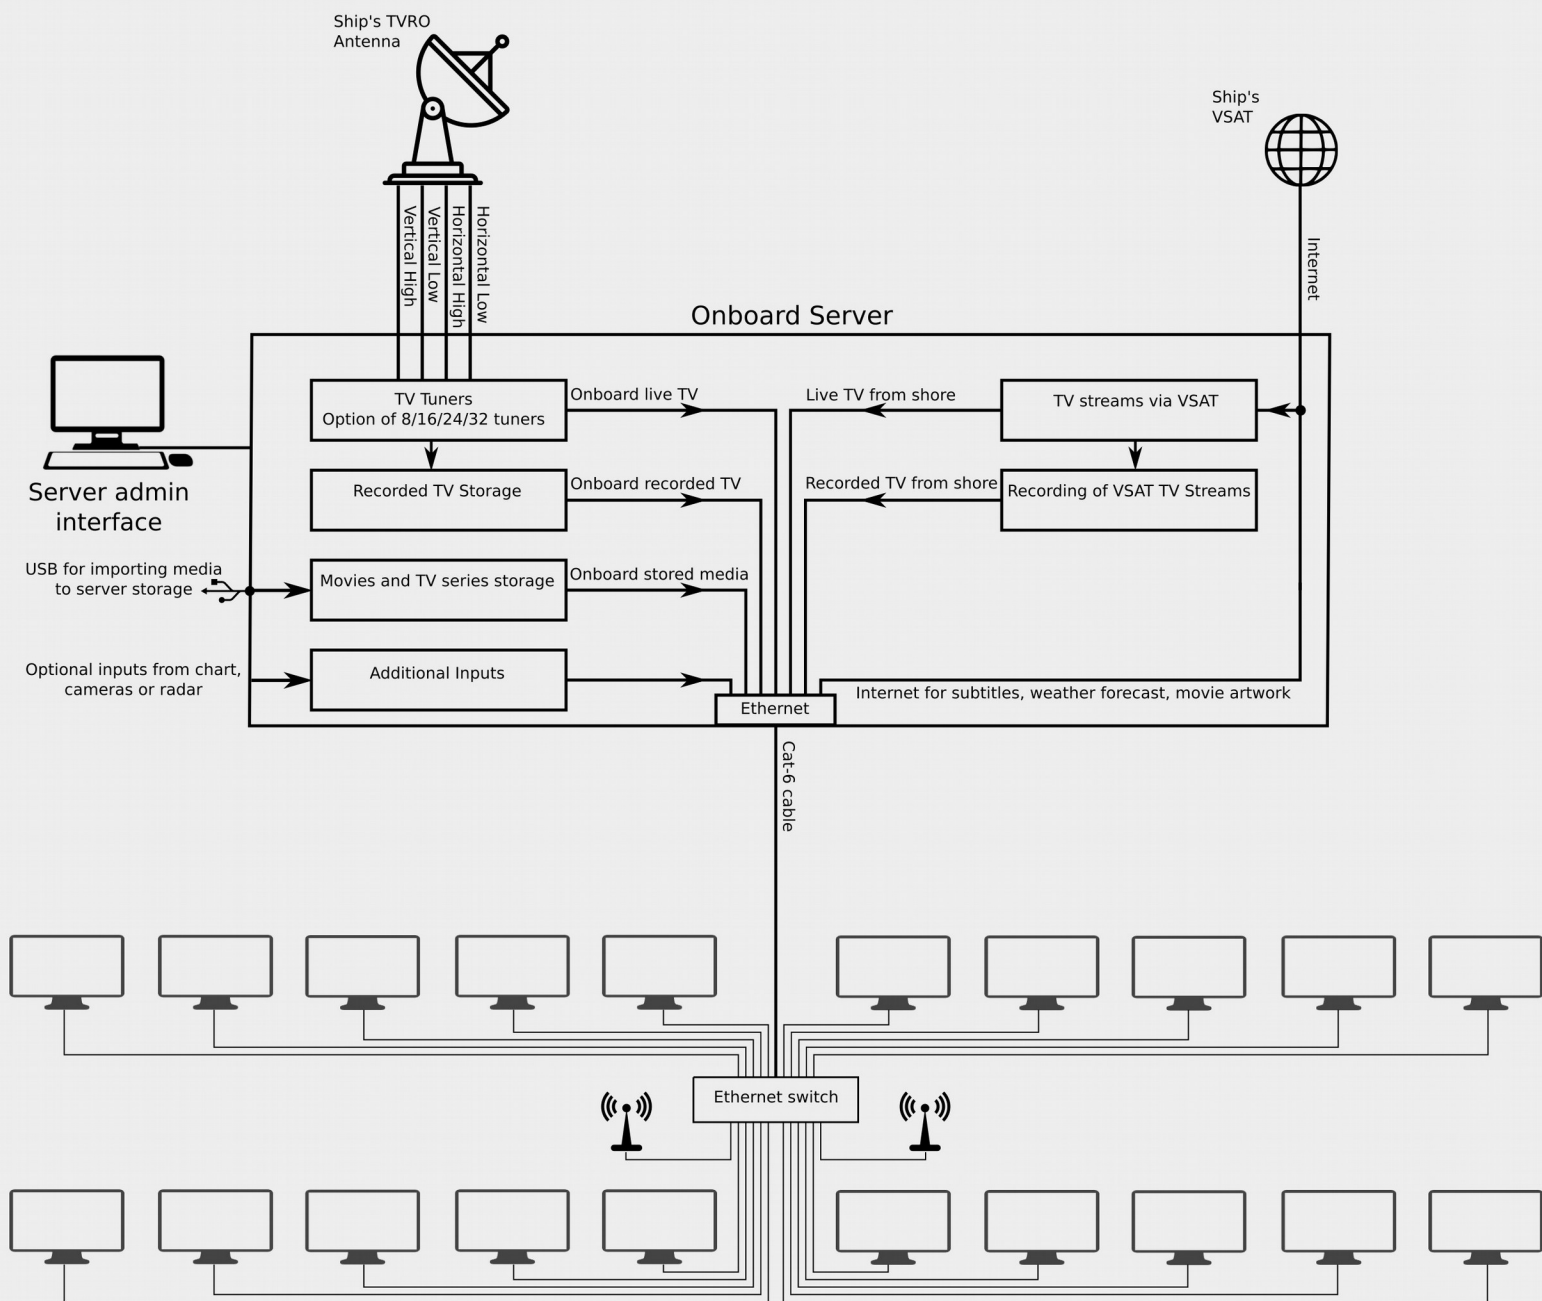

Easily expand your IPTV system to securely distribute any source around the vessel

Whether you wish to distribute ECDIS, radar, engine monitoring, CCTV cameras, diver and ROV cameras, VHF and MF/HF radio

Contact us for a solution

Customise the system to meet your needs

Stream TV over VSAT from the Shore to the Ship

When the ship is outside of your preferred satellite TV footprint, you can still keep up to date with your favourite TV shows, news and sports

Stream TV over VSAT with our highly efficient video compression

Streamed TV can be recorded to the central server and watched later, anywhere around the ship

- Stream TV using as little as 400kbps internet bandwidth per channel
- Streamed TV can be recorded and viewed later
- Available throughout the vessel
- Schedule favourite series to automatically record
- Watch TV from different regions around the world
- Optionally, live stream cameras or other video feeds from ship to shore

IPTV systems are no longer reserved for luxury yachts, cruise ships and large offshore installations

IP Marine brings you affordable IPTV systems for any size of vessels

micro-IPTV

micro-IPTV is designed for smaller vessels and vessels with a small number of crew

Bringing you all the benefits of an IPTV system to fishing vessels, work boats and small ferries
